| <b>Description</b>  |  |                |                     |
| <p>Design Statement</p> <p>Traditional Remodel</p> <p>The primary goal of this kitchen remodel project was to replace the existing contemporary cabinetry with cabinetry that better suited the traditional style of the home. Additionally, the homeowner wanted the kitchen to flow into the adjacent great room for entertaining. Specific requests included shoe storage, integration of a flat panel TV and small drawer storage for writing supplies. Other items included a plate rack, coffee cup storage, and a furniture piece for decorative items. In addition to kitchen cabinetry, the homeowner wanted bookcases in the great room.</p> <p>The cabinetry is Wellborn Premier Savannah Maple in “Glacier” for the perimeter cabinetry and great room bookcases. Cabinetry for the island is Savannah Cherry in the “Light Cherry” finish. The cabinetry at the TV area provides base shoe storage. Sink base mats were trimmed to fit the shoe storage shelves for ease of cleaning. Above the shoe storage are individual single drawer units for small items. The flat panel TV is installed on a wall bracket above. At the corner, a 12”D pantry and 24”D pantry were used to construct a “blind pantry”. At the left of the sink is a trash pull-out, to the right is a 4-drawer cabinet. The tall microwave cabinet was comprised of individual components; a 30”W base cabinet for cookie sheets, a horizontal spice drawer cabinet, a 30”W wall cabinet for the built-in microwave, a custom-designed coffee mug cubby, a plate rack and a glass door wall cabinet. Lighted glass door wall cabinets were included above the main runs of cabinetry with stacked crown to the ceiling.</p> <p>The island was designed at two different heights to provide seating for all, with the lower section for disabled guests. It is embellished with carved corbels, onlays, fluted panels and base molding.</p> <p>The armoire furniture piece was fabricated on site using cabinetry components. Queen Anne feet, onlays and stacked molding decorated the piece.</p> <p>The great room bookcases frame the new arch opening between the kitchen and the great room. The addition of the arch “married” both rooms and provided a continuous, open feeling to the space.</p> |  |                |                     |
